

## SKILL UP SEASON

*“Turning Classrooms into Career Launchpads”*

### EDITOR’S NOTE:

*Welcome to Skill Up Season!*

This is the season of transformation. At SADRE Solutions, we believe that every classroom can be a launchpad, and every project a gateway to real-world impact.

In this special edition, we unveil new industry collaborations, spotlight student success stories, and introduce innovations that are bridging the gap between learning and livelihood.

Whether it’s coding in Chennai, financial literacy in Bangalore, or employability in Krishnagiri—we’re turning knowledge into action and ambition into achievement.

Let’s dive into a season bursting with energy, opportunity, and future-ready careers.

### COVER STORY: PROJEXUS – PROJECTS THAT PROPEL CAREERS

SADRE Solutions is excited to launch Projexus, an initiative connecting students with companies through immersive virtual internships that solve real business challenges.

Spanning **45 to 60 days**, these internships serve as career-launching experiences, not just résumé fillers. Industry leaders like **Mr. Samson** (SSK Chemical & Truenova Technologies), **Mr. Bala Kannan** (Mapol Group & ESG Sentinel), and Tenacitics India Pvt. Ltd. have praised Projexus for fostering cross-sector learning, ESG-focused skills, and providing a trusted talent pipeline.

Projexus is transforming internships from passive learning to active problem-solving, helping students become sought-after professionals.

## PROUD MOMENTS AT TENACITICS: TRAINEES TURNED TECHIES

What a joy it was to reconnect with our Full Stack trainees—now thriving as professionals at Tenacitics India Pvt. Ltd., Chennai. Just six months ago, they were learning the ropes.

Today, they're contributing to global software projects. Their transformation is living proof that the right training, mentorship, and belief can change a trajectory. They spoke with pride about how SADRE's approach prepared them to hit the ground running.

Thank you, Tenacitics, for your continued belief in our mission—and in the power of Projexus.

## BEYOND THE PAYSリップ: FINANCIAL LITERACY THAT EMPOWERS

Money matters—but it's rarely taught. That's changing now.

SADRE Solutions has teamed up with New Leaf Advisory, led by finance expert Mr. Ramesh Yadav, to design a practical Personal Finance curriculum for students and young professionals.

This isn't just theory. The modules cover:

- Budgeting & savings habits
- Decoding payslips, PF, and ESI
- Credit & investment basics
- Smart planning for financial independence

With this addition, SADRE's skilling programs now empower learners not just for jobs, but for financially confident lives. The classroom now includes the wallet—and it's about time.

## PROJECT TIME UPDATE: SCALING EMPLOYABILITY IN KRISHNAGIRI

A major step forward for Project TIME as our team met Mr. C. Dinesh Kumar, IAS, the District Collector of Krishnagiri. The mission? Expanding our reach and creating deeper impact across colleges.

Key Outcomes:

- Green Light for College Outreach
- Collector to attend Bargur GEC Event (July 29)
- CSR Stakeholder Meet Facilitated by District
- CER-based Partnerships in Progress

This is more than just support—it's momentum. We're gearing up for large-scale transformation in Tier II and III institutions, building bridges from the classroom straight to career corridors.

## UIBS TRAINING: FINANCE MEETS AI IN THE CLASSROOM

Two powerful, 5-day training tracks recently concluded at United International Business School (UIBS):

◆ BCom & BBA Students

Practical Financial Literacy & Smart Money Management

Covered salary decoding, budget tracking, investment awareness, and personal finance planning.

◆ BCA Students

Applied AI for Productivity: From Prompt to Deployment

Taught students prompt engineering, automation workflows, and basic AI deployments.

Through interactive games, real-world cases, and group challenges, students didn't just learn—they grew. Certificates were awarded, but more importantly, so was confidence.

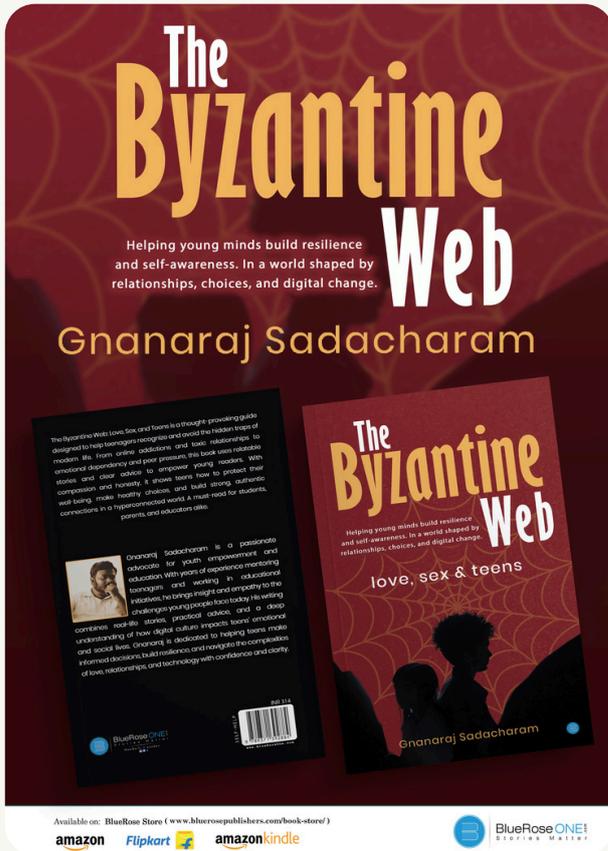

## KUPPAM ENGINEERING COLLEGE: A NEW CHAPTER IN RURAL SKILLING

During our recent visit to Kuppam Engineering College, Andhra Pradesh, the vision was clear: no student left behind due to geography.

In discussions with Dr. Jayakumar and Dr. S. Sudhakar Babu, we charted a bold roadmap to equip their students with market-relevant skills, placement support, and real-world exposure.

This partnership reinforces SADRE's belief that talent exists everywhere—it just needs a platform to shine.

## CONGRATULATIONS!

We're thrilled to announce the launch of Byzantine Web, a deeply reflective and thought-provoking book by our founder, Mr. Gnanaraj Sadacharam.

This exceptional work delves into the intricate intersections of life, choices, and identity, offering a fresh and captivating perspective. We extend our heartfelt congratulations to Mr. Gnanaraj Sadacharam on this remarkable accomplishment!

Byzantine Web is now available online—get your copy today and immerse yourself in the stories that shape who we are.

Available on:

## VOICES OF INSPIRATION

"I had the privilege of wearing my mentor's hat on the MentoNest platform of SADRE SOLUTIONS, guiding bright and curious college students in the fascinating world of UI/UX Design.

Mentorship is more than sharing knowledge—it's about sparking curiosity, nurturing creativity, and helping others discover their own potential. Each conversation with these aspiring designers reminded me that great design isn't just about making things look beautiful; it's about making experiences meaningful, intuitive, and inclusive.

I'm grateful to SADRE SOLUTIONS and MentoNest for creating a platform that bridges the gap between industry experience and academic learning.

To all aspiring designers out there—keep learning, keep exploring, and remember: the best designs are those that truly understand and serve the people who use them."
